

# Beach Conditions

Want to know the condition at the beach before schlepping there?

**Beach Condition Hotline # 305.792.1940**

Sunny Isles Beach Ocean Rescue lifeguards report daily on the conditions of the city's beach. Call the Beach Condition Hotline at 305.792.1940 for high and low tides, air and water temperatures, wind speed and direction. Get informed about possible rain, lightning, waves or rip currents and any beach closures.

You can also find out the UV Index for the day. The UV information is also posted at each lifeguard stand. Find out the color of the warning flags posted at our lifeguard towers and if there are any types of dangerous marine life in the water, such as jellyfish. Also learn some beach safety tips.

Beach conditions are also available daily on the City's official website at [www.sibfl.net](http://www.sibfl.net).
